

MURRAY LATTA
PROGRESSIVE MACHINE INC.

INDUSTRIAL MACHINERY

To our valued customers,

Murray Latta Progressive Machine is proud to be an essential services provider in providing both manufacturing and service to other key essential services in British Columbia. These include sectors such as public transportation, wastewater treatment, utilities, food processing, oil and gas, and mining to name a few. We plan to stay open and working, with as few interruptions as possible, over the coming weeks/months.

We are taking strong steps in preventing the spread of COVID-19 to our employees, their families, our customers and our communities. These include:

- All international travelers as well as those on domestic flights or cruise ships comply with 14 day isolation requirements
- People exposed to COVID-19 (or to someone that may have been exposed) or display any symptoms cannot enter our workplace and follow provincial guidelines
- We have implemented a work at home strategy where possible and have minimized staff at our facility
- We have implemented social distancing as a must throughout our facilities
- We do not allow any unscheduled visitors and have adopted strict protocols for scheduled visitors and shipping/receiving functions
- We follow handwashing and cleaning protocols

MLPM will continue to actively monitor and remain compliant with provincial and federal controls.

We look forward to working with you and getting through these trying times together. Please feel free to reach out with any questions/concerns you may have.

Sincerely,

Erwin Bartz

General Manager

Progressive Solutions, Traditional Values
